## Leading The Way

QHF, a trusted name for over 40 years, is a full service manufacturer & distributor of specialty coatings and related products servicing the branding and re-imaging markets. All of the products offered through QHF are high performance and extremely durable. QHF has evolved to become a progressive leader in our industry. Through the Q-Line family of products, QHF is "Leading the Way" by providing affordable, environmentally friendly specialty coatings. Our eco-friendly line of products is just one of our contributions to making our planet a more colorful, greener place to live.

## Special Services & Capabilities

- CUSTOM COLOR MATCHING**
- SAME DAY SHIPPING**
- LARGE SELECTION OF PRODUCTS**
- ON SITE TRAINING**
- WARRANTIED PRODUCTS**
- SMALL BATCH ORDERS**
- FACILITY ASSESSMENT**
- COLOR DOCUMENTATION**
- PROTOTYPING**
- SPECIAL PRODUCT DEVELOPMENT**
- VALUE ENGINEERING**

## The Q-Line Family of Products

**Q-COAT UC™** is a high performance 2-component acrylic - polyester polyurethane coating specifically formulated for metal surfaces and many plastic surfaces. Q-COAT UC™ is formulated with the highest performance acrylic resins, polyester resins, pigments, additives and solvents to assure the most durable and affordable product available to the industry. Q-COAT UC™ is an Environmentally friendly product that is low in HAP's - hazardous air pollutants and low in VOC's - volatile organic compounds.

**Q-COAT TC™** is a transparent coating used in the manufacture of plastic backlit signage. Q-COAT TC™ is a combination of high performance acrylic resins, pigments, special solvents and additives to assure maximum non-mottling spray application and long-term product performance. Q-COAT TC™ is available in conventional VOC or Environmentally Friendly formulations that are low in HAP's - hazardous air pollutants and low in VOC - volatile organic compounds.

**Q-COAT DC™** Display Coating is designed to meet the requirements of painting solvent sensitive foams, plastics and rigid PVC type materials. Q-COAT DC™ provides fast air-dry times, ease of spray application along with mar and scratch resistance.

**Q-COAT AC™** is a one-component fast air dry coating. This product is ideal for touch up kits (no pot life issues) and repainting metal signage in the field by brush and roll application to avoid over spray problems on surrounding surfaces and properties.

**Q-CROM™** products allow the spray application of chrome like appearance coatings for backlit plastic translucent or first surface opaque applications. When compared to conventional vacuum metalized procedures, these products are much more affordable and provide long color durability.

**Q-MASK™** products offer a variety of water-based strippable maskings. Applications include the decoration of plastic signage, spray booth wall protection and spray booth lighting lens protection. Q-MASK™ products are 0% VOC's and 0% in HAPS - hazardous air pollutants.

**Q-PRIM™** Primers consist of several primer systems for application on aluminum, steel, plastics, fiberglass, vinyls and other difficult to paint surfaces. Low in VOC's and HAPS these primers meet the needs of today's industry.

**Q-SOLV™** Specialty reducers provide a wide range of choices based on temperature, relative humidity and job size. Our Q-SOLV™ line also includes a full line of pre-cleaners in solvent or water-based options for lowering VOC and carbon footprint emissions.

# Leading The Way.

“ Q-COLR™ concentrated colorants are specially formulated to provide extremely durable, “fast hiding” bright colors for branding and re-imaging industries. Specially formulated with the highest quality, environmentally friendly pigments to provide an increased concentration level of color. The results are reduced inventory stocking requirements for the user and reduced labor steps during application. Q-COLR™ concentrated colorants have been formulated to be universally mixed with Q-COAT UC, Q-COAT TC, Q-COAT DC and Q-COAT AC paint systems providing a complete “family of solutions” without the added cost of stocking multiple paint lines. ”
