Q-SOLV™ 4416™ LACQUER THINNER BLEND

Q-SOLV™ CD4416™ Lacquer Thinner Blend is specifically formulated to clean and remove petroleum-based contaminants from bare metals and existing finishes. It's imperative to surface clean before and after sanding, or sand, shot or soda blasting. Proper surface preparation and surface cleaning assure primer and top coat adhesion to obtain long term corrosion resistance and overall coating durability.

APPLICATION:

1.

Safety:
Use only NIOSH approved respirators and personal protection equipment recommended for the product used.

Always review the MSDS – Material Safety Data Sheets before use.

2.

Clean the area to be sanded with **Q-SOLV™ 4416™ Lacquer Thinner Blend**. Aluminum, steel, galvanized steel and existing painted surfaces.

Always test existing painted surfaces to assure no lifting occurs.

3.

Prepare the surface as recommended by sanding or sand, shot or soda blasting. *Refer to Primer Data Sheets for surface application recommendations.*

4.

Completely wet the substrate with **Q-SOLV™ 4416™ Lacquer Thinner Blend**. While still wet, using a separate dry cotton cloth, completely dry the surface removing the dirty cleaner rotating the cloths often. This is referred to as the "Wipe On, Wipe Off Method". Always use clean cotton wiping cloths replacing regularly. Never allow **Q-SOLV™ 4416™ Lacquer Thinner Blend** to evaporate on the surface.

5. **PRIMER / TOP COAT APPLICATION:**

Apply primer and topcoat as recommended.
See primer and top coat Data Sheets for specific application recommendations.

Always test surface preparation, primer and topcoat compatibility to determine acceptability before any production run.
