Q-SOLV™ DR™ SERIES DISPLAY REDUCERS

Q-SOLV™ DR™ Series Low VOC Reducers are specifically designed to reduce **Q-COAT DC™** Display Coatings to provide the best spray application properties. Temperature, relative humidity, air movement, and application surface size all play a major role to be successful in painting any surface. Selection of the Reducer is the key for best results.

QHF **Environmentally Friendly** Product.

RECOMMENDED REDUCER APPLICATIONS WITH Q-COAT DC™ DISPLAY COATINGS:

Polycarbonate, acrylic, impact modified acrylic, CAB, ABS, styrene, foams, primed metals, wood, most semi rigid or rigid substrates, and many painted finishes. Test compatibility prior to production runs.

Q-SOLV DR™ REDUCERS:

Q-SOLV™ DR1210™ Low VOC Fast Reducer:	Use below 80°F on small or large surface areas.
Q-SOLV™ DR1220™ Low VOC Medium Reducer:	Use above 80°F on small or large surface areas.
Q-SOLV™ DR1230™ Low VOC Slow Reducer:	Use above 80°F on small or large surface areas.
Q-SOLV™ DR1270™ Substrate sensitive Reducer:	Use on small or large “Sensitive Substrates”.
Q-SOLV™ DR1280™ Retarder:	Use as needed with DR Series Reducers.
Q-SOLV™ DR1290™ Matte Additive: .	Use as a substitute for some or all of the reducer to lower the gloss level
Q-SOLV™ DR1293™ Flow Additive:	Fish eye remover.

Reduction Ratio:
1 part **Q-COAT DC™** Coating Color
1 part **Q-SOLV DR™** Series Reducer
For large surface areas or high temperatures an additional amount 5-10% of **Q-SOLV™ DR1280™** Retarder may be required.

Always test surface preparation, primer and topcoat compatibility to determine acceptability before any production run.
